

Amendment  
SN 09/126,884  
Page 9 of 11

#### APPENDIX I

#### **Marked-up Version of Amended Paragraphs of the Specification**

Beginning on Page 11, line 5:

If the query at step 506 is answered affirmatively, then the routine 500 proceeds to step 510, where a query is made as to whether it is time to insert the replacement packet R into the slotted output transport stream. If the query at step 510 is answered affirmatively, then the routine 500 proceeds to step [514] 512, where the insertion packet R is inserted into the transport stream  $T_{out}$  in place of the NULL packet. The routine 500 then proceeds to step 504. If the query at step 510 is answered negatively, then the routine proceeds to step 508.
